Program Milestones

Program milestone courses should be taken in the term and order noted.

Make Your Summers Matter

Program Electives -
Any ALH, NUR, PSY, SOC, VET Prefix Any
General Education, Core IV
ACC 111 Accounting I
ACC112 Accounting II
BUS 115 Management 1

General Advising Notes

English and Math courses should be taken in your first term, if possible, or first year.

Core I courses have the following prefixes: ENG,SPE.

Core II courses have the following prefixes: ART, COM, ENG, HIS.

Core III courses have the following prefixes: ECO, POS, PSY, SOC.

Core IV courses have the following prefixes: BIO, CHM, MAT, PHY, SCI.

If you plan to continue your education:
Work closely with your faculty advisor and transfer counselor to make sure your courses transfer smoothly.

Part-time option available, please refer to the college catalog.

Program Description

The Health Studies program provides a broad-based curriculum with an emphasis on preparation for continued study in the health science field that includes an exploration of health careers, as well as the basic science courses necessary for many health occupation programs. The program is designed for students seeking one of three academic and career paths: a) to prepare for transfer into a specialized associate degree health program; or b) to continue their studies at the Baccalaureate level; or c) a mid-level position in the health-care field. Students planning to transfer should select electives consistent with their desired transfer program and work closely with an academic advisor for course selection.

Program Learning Outcomes

Upon successful completion of the Associate of Science Degree in Health Studies, graduates will be able to:

- Discuss the cultural and historical context of the U.S. health care system.
- Communicate effectively within the healthcare system using medical language and abbreviations.
- Explain the importance and application of basic ethical behavior in the exercise of confidentiality in health care.
- Recognize the value of diversity in opinions, values, abilities and cultures in the science and health care fields.
- Collect, analyze, and present quantitative and qualitative information using appropriate data and technology.
- Perform and effectively communicate the results of scientific investigations, and explain how research is done in science.

Career Opportunities

Students completing this program will be prepared for entry-level positions in computer support, network management, systems management, and cybersecurity, as well as sales and technical information positions. Graduates may also choose to continue their education at a four-year institution in Information Technology or a related field.

*Articulation agreements exist between York County Community College and various colleges and universities.
Please work with your advisor for information regarding these agreements.*
